THE BEST DIESEL FUEL TRAILER ON THE MARKET TODAY.

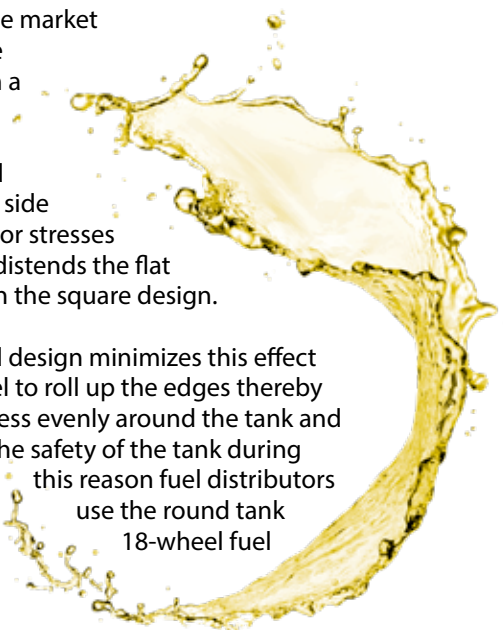

LEE Diesel Fuel Trailers are designed by expert engineers and assembled by master craftsmen who make safety and durability their highest priority to create the best diesel fuel trailers on the market today.

Round Is Best.

Any fuel tank on the market utilizing the square design suffers from a major design flaw. During transport, fuel surges forward and back and from side to side. This behavior stresses the 90° welds and distends the flat surfaces inherent in the square design.

The superior round design minimizes this effect by allowing the fuel to roll up the edges thereby distributing the stress evenly around the tank and increasing the safety of the tank during transport. For this reason fuel distributors use the round tank design for all 18-wheel fuel transports.

FILL-RITE®

The Most Trusted Name in Pumps and Meters

Tuthill Fill-Rite is the most trusted name in pumps and meters and we are proud say Fill-Rite pumps now come standard on all LEE diesel fuel trailers and tanks. We now offer a growing line Tuthill Fill-Rite products.

Each diesel fuel trailer from Lee comes equipped with tandem Dexter Torflex® axles. The independent wheel suspension and self-damping action provides improved suspension characteristics.

The parts to be coated are positively grounded, so that the charged particles adhere to them until melted and fused into a solid coating in a curing oven. The result: a sleek, strong, high-quality finish.

LEE DFT Advantage

Brakes Standard

Brakes on one axle are standard for all DT 475 and DT 975s.

Battery/Toolbox

The locking steel toolbox now also protects the battery and your extra equipment from the elements.

Circular Design

Unlike square tanks, round tanks distribute the stress of surging diesel evenly around the tank.

Dished Flanged Ends

The radius of the dished ends is formed instead of welded which decreases the stress points. During starts and stops diesel fuel rolls up the ends instead of surging forward and back. This reduces stress on the tank, trailer and tow vehicle.

Heavy Duty Suction Pipe

Standard suction pipes can break with the movement of fuel in the tank. Our custom suction pipes are the strongest on the market and will never need repair.

Rigid Trailer Frame

Heavy duty trailer frame withstands the toughest conditions on any farm and dirt roads.

Refueling Access

All refueling components, fuel pump, fuel gauge, and fuel cap are placed in one easy to access location at the top and rear of the trailer.

Highly Visible

Low-profile, square fuel trailer designs cannot be seen through the rear-view mirror while backing up. Lee diesel fuel trailers are highly visible in your rear-view mirror which increases safety while backing.

Rubber Torsion Axles

Rubber cushioning eliminates metal-to-metal contact and reduces road shock for better cargo protection. The torsion arm is forged for maximum strength.

Powder Coating

The powder coating creates a durable long-lasting high-quality finish.

Baffle System

Inside the tank, a heavy-duty baffle system keeps the motion of the fuel to a minimum.

Rollover Protection System*

A heavy duty roll cage protects the fuel pump and inlet valve in the event of a rollover.
*D.O.T. line of fuel trailers.

Rear Bumper

The rear bumper provides a sturdy platform for accessing the fuel nozzle.

Diamond Plate Fenders

Heavy-duty fenders provide a sturdy service platform and protect the tank and tow vehicle from debris during transport.

BOSS Cat-4

MODEL	TRACTOR	IMPLEMENT	PINS	WEIGHT	PRICE
LA-QHC4	Cat-4	Cat-4	Cat-4	298 lb	\$2,840
LA-QHC4N3	Cat-3W & 4H	Cat-3W & 4H	Cat-3	281 lb	\$2,745
LA-QHC4N4	Cat-3W & 4H	Cat-3W & 4H	Cat-4	281 lb	\$2,745

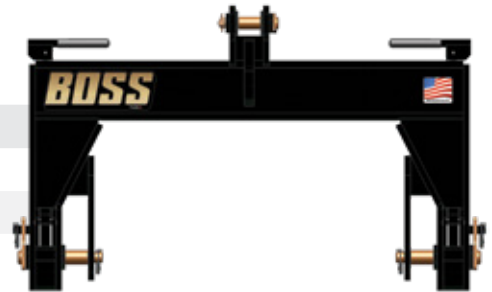

This BOSS is a hoss. The only thing tougher than a Cat-3 BOSS is a Cat-4 BOSS. Quit worrying about that cast iron OEM cat-4 giving way. Put the BOSS to work for you.

BOSS Cat-3-2 Combo

MODEL	TRACTOR	IMPLEMENT	PINS	WEIGHT	PRICE
LA-QHC3C33	Cat-2 & 3	Cat-3	Cat-3	225 lb	\$1,689
LA-QHC3C32	Cat-2 & 3	Cat-3	Cat-2	225 lb	\$1,689

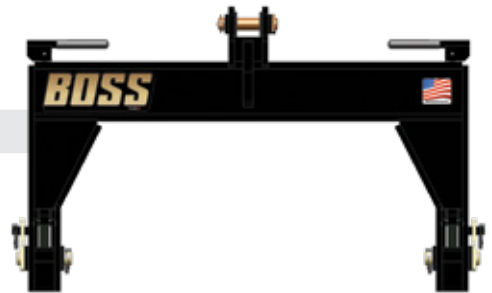

It's the best three-point hitch on the market that is a Cat-3 hitch that fits a Cat-2 or Cat-3 tractor to lift Cat-3 equipment. It's like having two hitches for the price of one!

BOSS Cat-3

MODEL	TRACTOR	IMPLEMENT	PINS	WEIGHT	PRICE
LA-QHC3	Cat-3	Cat-3	Cat-3	215 lb	\$1,489

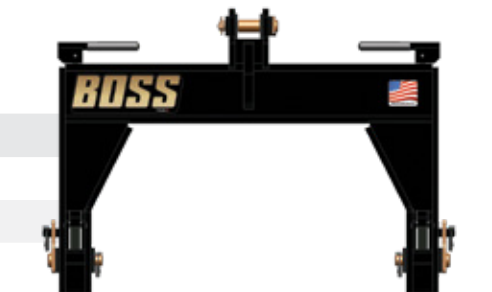

Tractor manufacturers sometimes make their own hitches. Don't settle with a cast iron OEM hitch! Demand a BOSS three-point hitch that'll outlast your tractor!

BOSS Cat-3N

MODEL	TRACTOR	IMPLEMENT	PINS	WEIGHT	PRICE
LA-QHC3N3	Cat-2W & 3H	Cat-2W & 3H	Cat-3	201 lb	\$1,489
LA-QHC3N2	Cat-2W & 3H	Cat-2W & 3H	Cat-2	201 lb	\$1,489

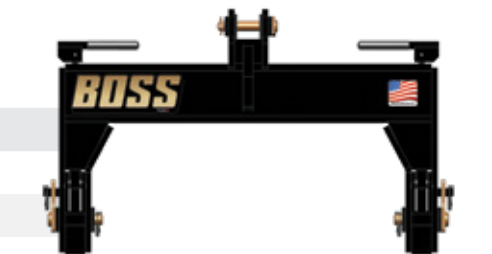

The BOSS Cat-3N is as tall as the Cat-3 but as wide as the Cat-2. This narrow hitch is perfect for carrying heavier implements on your narrow setup.

BOSS Cat-2

MODEL	TRACTOR	IMPLEMENT	PINS	WEIGHT	PRICE
LA-QHC2C23	Cat-2	Cat-2	Cat-3	200 lb	\$1,245
LA-QHC2C22	Cat-2	Cat-2	Cat-2	200 lb	\$1,245

Take the headache out of connecting your Cat-2 implements to your Cat-2 tractor. Quickly and safely connect and disconnect your tools with ease.

PLANT ON 20 INCH ROW SPACING WITH 40 INCH ROW EQUIPMENT.

With this Side Swipe Boss Hitch, a grower can use his existing equipment to plant and possibly work in tight row spacings.

Quick Hitch Dimensions

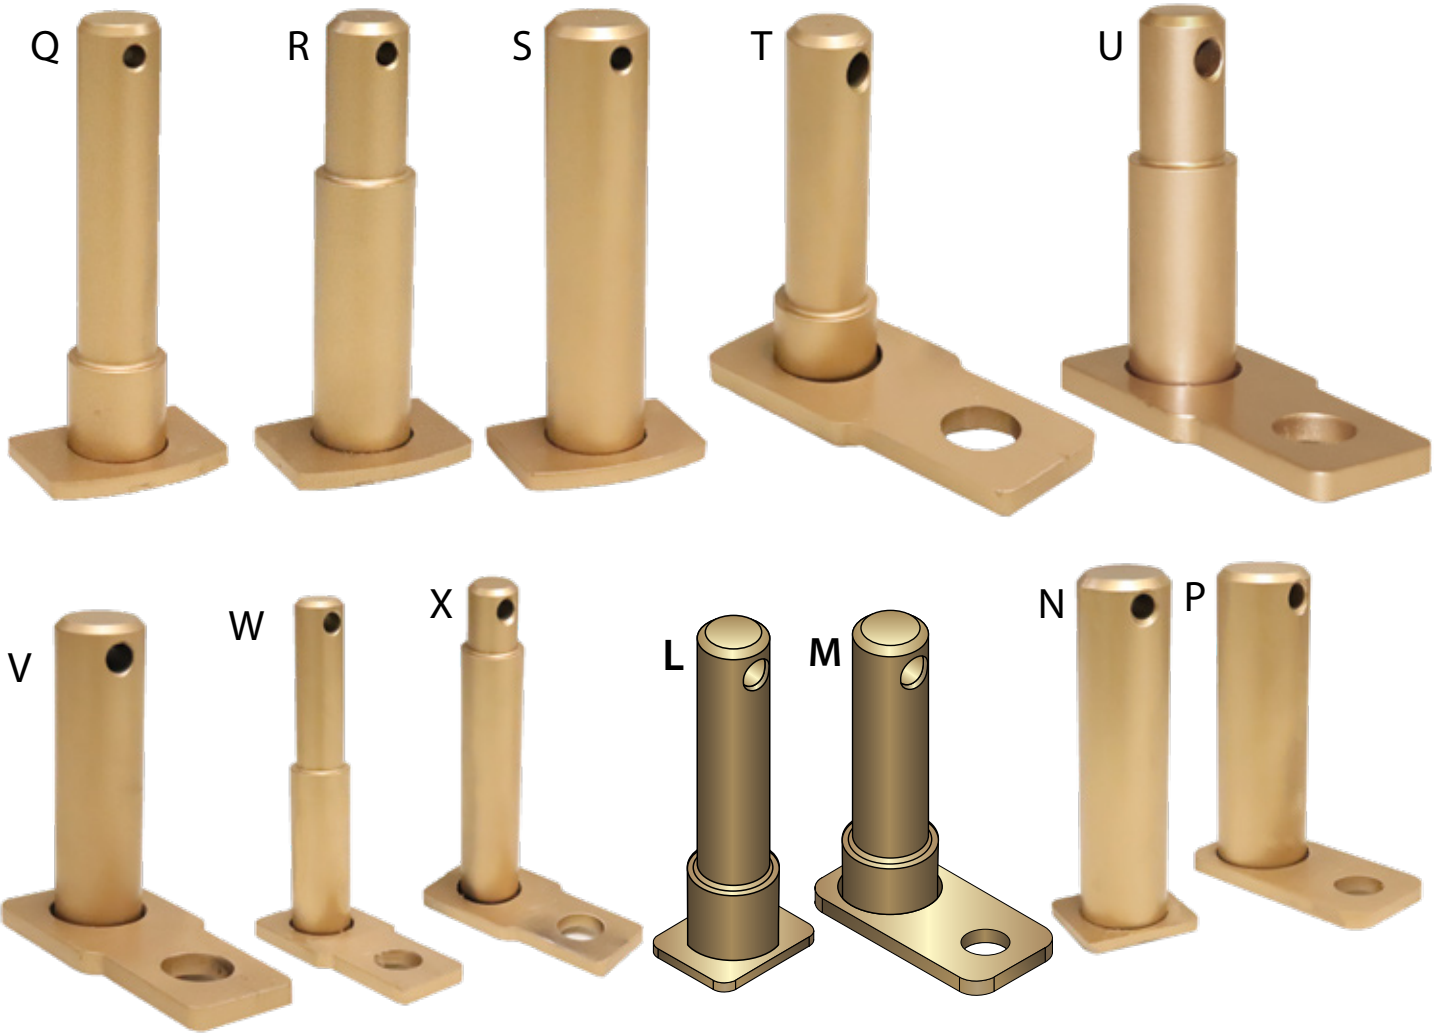

The following dimensions are industry wide specifications. The Lee Quick Hitches are designed to have slight dimensional alterations. This change is made to allow for a more versatile field application, resulting in easier mounting and dismounting of implements. Note: The C3C32 or C3C33 combination hitch can be used with any category 2 or 3 tractors. The implement side of the hitch will always be category 3.

All other products purchased from other vendors that are sold and distributed by LeeAgra, Inc., carries the original manufacturers' warranty, LeeAgra will assist in providing service and assistance for warranty of these products. All requests for warranty must be in writing and have written authorization from LeeAgra, Inc.

In 1949 one of the last American blacksmiths started a humble business with a simple code: do the best job you can every day. That began a family tradition of quality and innovation that lives to this day.

My grandfather Dick Lee began repairing farm equipment as a blacksmith in a small shop in Idalou, Texas. His customers were mostly local farmers who needed repairs made to their farm equipment. To keep the farmers working in their fields longer he would repair the equipment so they wouldn't break down. Soon the word spread that he could repair the equipment better than the manufacturer could build it.

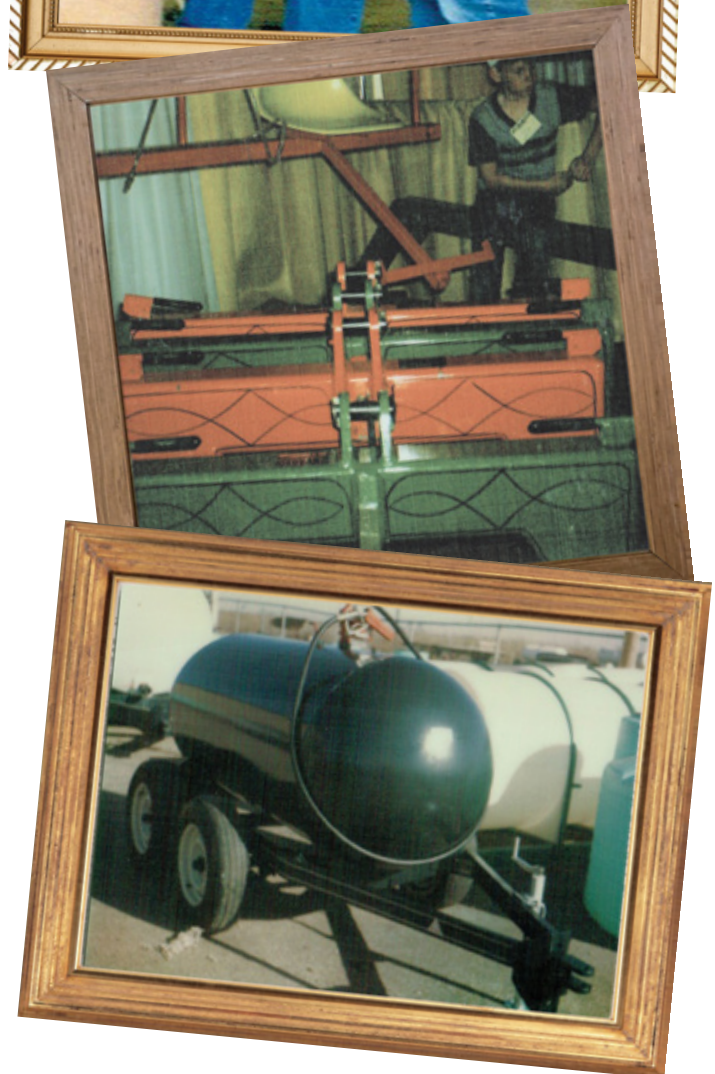

He taught my father, Sonny Lee, these same skills and thus began West Texas Lee's family tradition making products better than they had to be.

To meet the demands of the farmer, my father moved the focus of the business to manufacture farm equipment. Working with local farmers and farm dealers he developed the BOSS quick hitch, the complete line of agriculture and D.O.T. spec diesel fuel trailers, and the Spider high-clearance tractor. Sonny Lee built all products with one thing in mind: quality. His attention to detail brought West Texas Lee new customers throughout North and South America.

Today the family tradition continues at LeeAgra, Inc. with products like LoadSABERs easing farm chores, the DT 200 bringing fuel storage to customers around the world and the compact but powerful Avenger and Predator high-clearance tractors aiding crop researchers and specialty crops worldwide. Since 1949 the Lee family tradition has provided our great customers the highest quality and most innovative products that were built to last.

-Lynn Lee, President, LeeAgra, Inc.
